GUROBI INSTALLATION IN JULIA

1. Register for a free academic license:

   https://www.gurobi.com/downloads/end-user-license-agreement-academic

   and dowload Gurobi for your computer platform.

2. Request for an academic license (run the stated procedure and you will get a free valid academic license). For this request to be successful, please use you institutional Email account.

3. Open a Julia session and type (Mac users):

   ENV["GUROBI_HOME"] = "/Applications"

   or (Windows users)
   ENV["GUROBI_HOME"] = "C:\\gurobi901\\win64"

   And the following commands:

   Import Pkg
   Pkg.add("Gurobi")
   Using Gurobi

   Try this command in any trouble:
   Pkg.build("Gurobi")
